Objective

Seeking entry-level computer programming position where I can put my computer programming skills to work for a great company. I have been learning computer programming on my own since 2014 and have completed numerous Udemy and Youtube courses dealing with ReactJS, Python & Django, Swift, Android Java, along with a couple others. I am finally looking to jump into computer programming full time. I have also been working on my own project for the past 6+ months using Java with Android Studio and Firebase Firestore as a backend and am hoping to integrate React and Swift in the near future.

Summary of Skills

- Experience in Java, Android Studio, ReactJS, Swift, Python, Django and working with Firebase DB, Parse, SQLite, and GitHub.
- Great team working, collaboration, and communication skills
- Great problem solving, researching, and analytical skills
- Proven time-management skills and the ability to complete projects within specified deadlines.

Work Experience

April 2019 - PRESENT

RMW Interiors & Architecture, San Francisco – *Architectural Designer*

- Working with teams from 2 - 5 people on interior renovation projects of near 50,000 sq ft.
- Participated in meetings with clients and contractors

October 2017 - April 2019

Woods Bagot Architecture, San Francisco – *Architectural Designer*

- Worked on Construction Administration phase of project and coordinated with sub-contractor and general contractors. Performed site walks and reports.
- Worked on a wide range of phase and projects from 114 unit multi family housing and multi-tower +1000 unit multi family projects to government civic centers, college campuses and labs.

Education

August 2008 - June 2014

University of Arizona – Tucson, Arizona – *Bachelor's of Architecture*
